Automatic Configuration - DHCP:

This setting is most commonly used by Cable operators.

Host Name:

Enter the host name provided by your ISP.

Domain Name:

Enter the domain name provided by your ISP.

Local IP Address:

This is the address of the router.

Subnet Mask:

This is the subnet mask of the router.

DHCP Server:

Allows the router to manage your IP addresses.

Start IP Address:

The address you would like to start with.

Maximum DHCP Users:

You may limit the number of addresses your router hands out.

Time Settings:

Choose the time zone you are in and Summer Time (DST) period. The router can use local time or UTC time.
